### Instruction

RF900 is a UHF RFID sled for PM90. This manual provides information about basic features and using the RF900. Please read this manual carefully before using your UHF RFID reader to ensure safe and proper use.

### **Revision History**

| Revision | Date        | Description   |
|----------|-------------|---|
| V01      | 29 Oct 2021 | Initial release   |
| V02      | 01 Nov 2021 | Updated charging scenario<br>Added note for appending Wedge - prefix and suffix |
| V03      | 24 Nov 2021 | Updated cradle (SSC) charging scenario  |

#### **Related Document**

Following documents are related to RF900. Download the documents on <u>Service Portal</u> > Download > RFID Control Apps & Document.

- RFID Control User Guide describes how to use the RFID Control and RFID Demo applications.
- RFID Control Configuration Tool User Guide describes how to use the RFID Control Configuration Tool.

### **RF900 SKUs**

The contents of this manual can cover the following SKUs.

| SKU  | Part Number  | RFID Engine         | Location |
|------|--------------|---------------------|----------|
| SKU1 | RF900-00RY-2 | Impinj® Indy® R2000 | EU       |
| SKU2 | RF900-00RY-5 |                     | US, KR   |

### **Product Standard Accessories**

The following items are in the product box.

| Accessory | Name                  |
|-----------|-----------------------|
|           | Battery pack          |
|           | 5V / 2A power adapter |
|           | AC plug               |
|           | USB type C cable      |
|           | Hand Strap            |

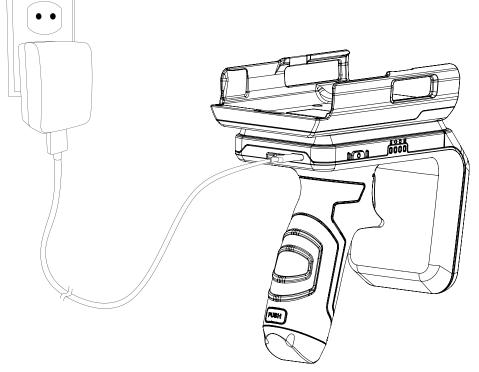

### **Charge the Device**

*Caution:* Always use an original charger and cable from Point Mobile. Other chargers and cables may damage RF900. Also, make sure the connector, charger, cable is not wet. Follow the <u>Battery Safety Information</u> for safety of using the battery.

#### Charge with AC/DC adaptor

- 1. Assemble the AC plug and power adapter.
- 2. Plug USB type C cable to the power adapter.
- 3. Connect the cable to USB connector of RF900.
- 4. Provide power by plugging the power adapter to the power outlet.

Figure 2 Charge RF900 (Adapter)

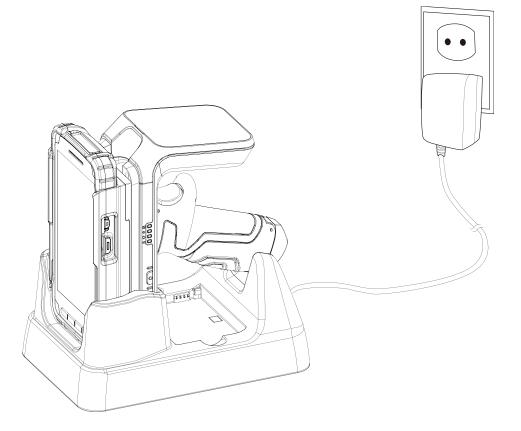

0

**Note:** If the adapter is connected to RF900 with PM90 mounted, only RF900 will be charged. Conversely, if the adapter is connected to PM90, PM90 will be charged first, and RF900 starts charging after PM90 is fully charged.

#### **Charging with Cradle**

#### SSC (Single Slot Cradle)

Figure 3 Charging with RF900 and PM90 (SSC)

Charge the RF900 with PM90 mounted through the cradle (Optional accessory: PM90-SSC2, PM90-SSC2-5). Place the device onto the cradle as shown in Figure 3.

Note: If you use the cradle to charge, PM90 and RF900 will be charged simultaneously.

#### 4SBC (4 Slot Battery Cradle)

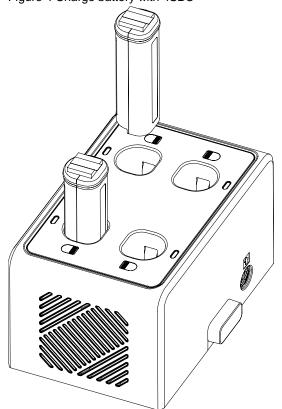

4SBC is a charging cradle for the battery of Point Mobile RFID sled models.

All RFID reader's replaceable batteries can be charged with 4SBC. And the cradle can charge up to 4 batteries at the same time.

Insert the battery into the slot with correct orientation. The LED indicator next to the slot will light up to confirm the charging. (Red – Charging / Green – Fully charged)

Find more detail in RF851 4SBC Quick Start Guide.

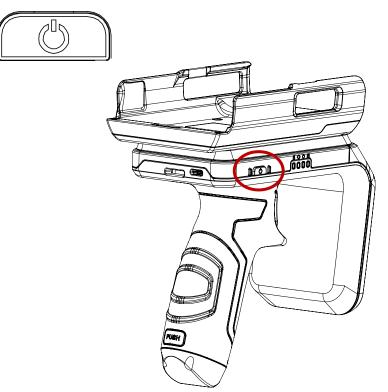

Figure 4 Charge battery with 4SBC

### Turn on/off the Device

To turn on or off the RF900, press and hold the power button next to the LED indicator for 2 seconds (Until the RF900's LED indicator lights on/off).

Figure 5 RF900 Power button

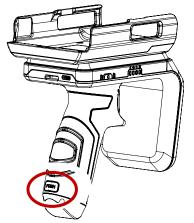

### **Replace the Battery**

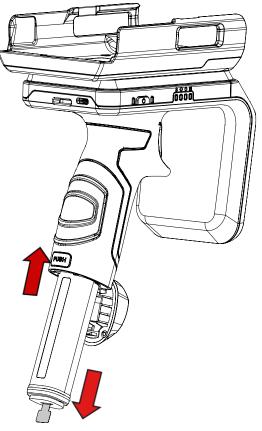

When the battery level is low, replace the battery with a charged one.

1. Press Battery release button on the back of the handle to open the battery cover.

Figure 6 Battery release button

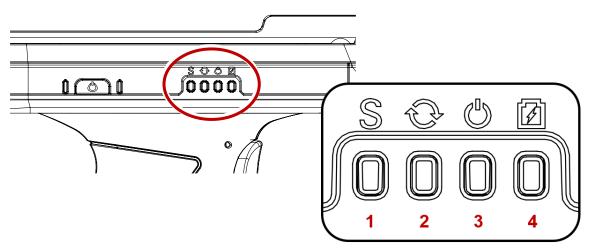

2. Remove the battery by pulling the strap on the battery and replace the battery. Figure 7 Replace battery

3. Close the battery cover firmly until it clicks.

### **LED Indicator**

Figure 8 RF900 LED Indicator

| No | Indicator          | Status                           | Indication   |
|----|--------------------|----------------------------------|--|
| 1  | 1 Trigger Made LED | O Turned off                     | UHF RFID mode  |
|    | Trigger-Mode LED   | Solid red                        | Barcode scan mode  |

| 4  | Charging LED       | Alternately blinking green & red | Battery fault  |
|    |                    | 🔅 Blinking red                   | Low battery<br>/ Charging temperature is too high or low |

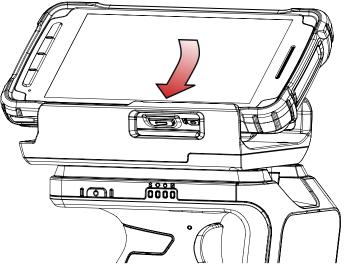

Note: When RF900 enters sleep mode, all LED indicators will turn off.

#### **Install PM90**

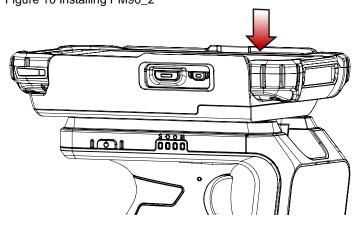

Install PM90 onto the RF900. Regardless of the battery (standard or extended), the device can be installed.

1. Insert the PM90 into the retention fixture of RF900 from the left or right side first.

Figure 9 Installing PM90\_1

2. Push the other side of PM90 down firmly. Figure 10 Installing PM90\_2

3. To remove, hold the RF900 and pull up one side of PM90.

### Install the RFID Control App

Connect your PM90 and RF900, set up the configuration, and update the firmware of the RF900 using RFID Control application. The app can be downloaded from Point Mobile Service Portal website.

This guide only describes a few basic features of RFID Control, so please find more detail information in <u>RFID Control User Guide</u>.

To install RFID Control,

- 1. Access to Service Portal and log in.
- 2. Go to the Download board and find a post titled as RFID Control Apps & Document.
- 3. Download the RFID Control application.
- 4. Connect PM90 with PC and copy the apk file to internal storage of PM90.
- 5. Go to **FileExplorer FileExplorer FileExplore**

| =                 | PM90                           | ९ 🔳 :                       |

| $\langle \rangle$ | devinfo.html<br>12.56 kB Jan 1 | RFIDContro<br>5.91 MB Oct 7 |

6. To run the app, tap RFID Control 📻 from App drawer or EmKit 鄃

#### **Connect mode**

RF900 supports two following connect modes.

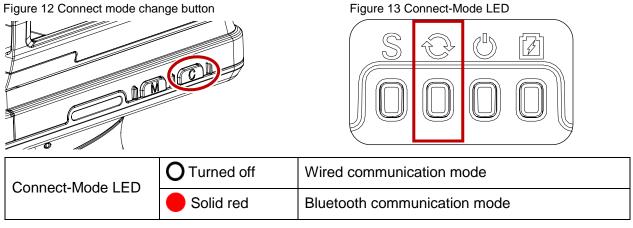

| Mode                          | Description  |
|-------------------------------|--|
| Wired communication (Default) | <ul> <li>Communicate through the pogo pin connectors on the PM90 and RF900.</li> <li>Need to install PM90 on RF900.</li> </ul> |
| Bluetooth communication       | Communicate through Bluetooth.   |

#### Change connect mode

To change connect mode from one to another,

- Press connect mode change button of RF900 until Connect-Mode LED changes.
- Change **Open option** in RFID Control.

Figure 12 Connect mode change button

#### Figure 14 RFID Control - Open options

Note: Disconnect current connection before changing connect mode. Connect mode change button does not work when RF900 is already connected to any PM90.

### Wired Communication

Wired communication is a default connect mode for RF900 and PM90.

Because the devices communicate through pogo pin connectors, you must install PM90 on RF900 first for wired communication.

- 1. Install PM90 on RF900 referring to Install PM90.
- 2. Make sure the Connect-Mode LED is turned off. (= Wired mode)
- 3. Launch RFID Control and check if the Open option set as Wired.
- 4. Turn on Connect to RFID Reader toggle switch.

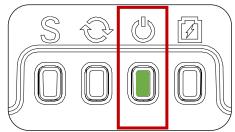

Figure 15 RFID Control - Wired mode

- 5. When the devices are connected properly,
  - State LED of RF900 lights green
  - An icon indicating the RF900's battery level is shown on the status bar

| Figure 16 Wired connected screen |               |         |             |  |  |
|----------------------------------|---------------|---------|-------------|--|--|
| 11:28                            |               | 🛄 ( 🕻 🤇 | 🎟 🛛 🐨 🖨 42% |  |  |

|                                  |               |         |             |  |  |

Figure 17 State LED (Wired or Bluetooth Connected)

#### Disconnect

In one of the following cases, the wired communication will be disconnected.

- Detach PM90 from RF900
- Turn off the Connect to RFID Reader toggle switch (In RFID Control)
- Change Open option to Bluetooth (In RFID Control)
- PM90 enters suspend mode
- Turn off the RF900 or PM90

#### Auto reconnect

Auto-reconnect is performed when RF900 and PM90, connected through wired communication once, are re-installed, or PM90 wakes up from suspend mode while installed on RF900.

For auto-reconnect, all of the following states must be satisfied.

- RF900 and PM90 are turned on
- RF900 and PM90 connected through wired communication at least one time
- Open option of RFID Control and connect mode of RF900 is set as Wired
- Previous connection is disconnected by removing PM90 from RF900 (If you disconnected it by toggle switch in RFID Control, Auto-reconnect does not perform.)

#### **Bluetooth Communication**

To connect RF900 and PM90 with Bluetooth, change the connect mode on the RF900 and RFID Control, first (Refer to <u>Connect mode - Change connect mode</u>).

When the **Open option** changes to Bluetooth while Bluetooth is turned off on PM90, the app tries to turn on the Bluetooth automatically. Tap **ALLOW**. If you denied, the app will be closed.

Figure 18 Bluetooth turn on dialog

#### **Connect methods**

There are two ways to establish the Bluetooth communication, Tap-to-Pair and Searching RFID reader. Choose more comfortable way.

#### Note: NFC Tap-to-Pair or Search RFID reader

- **NFC Tap-to-Pair**: Easy automatic pairing and connection process with a single tap
- Search RFID reader: Normal pairing and connection process with manual steps

#### **Tap-to-Pair**

Tap-to-Pair method uses NFC feature, and connect RF900 and PM90 just by getting them close. An NFC tag is on RF900 UHF RFID antenna to support Tap-to-Pair.

1. Change connect mode to Bluetooth on RF900

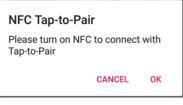

and Open option of RFID Control to Bluetooth.

2. Tap NFC Tap-to-Pair on RFID Control.

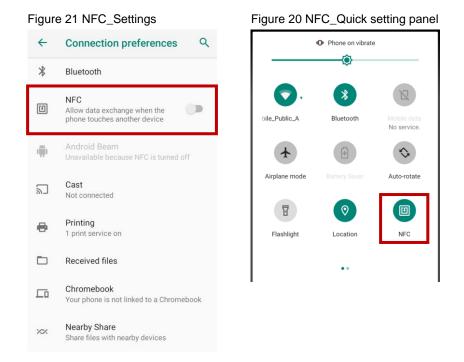

**Note:** NFC is enabled by default. But if NFC is turned off, app will ask to turn on NFC. Tap **OK** and tap NFC toggle switch to enable NFC.

Figure 19 NFC turn on dialog

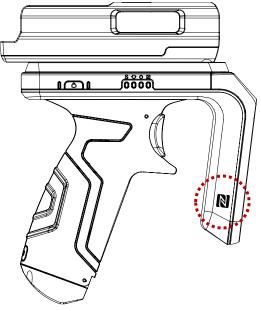

Or before access the Tap-to-Pair screen, enable NFC by one of below ways.

- Settings > Connected devices > Connection preferences > NFC > enable switch
- Open Quick setting panel > enable NFC

3. Referring to NFC antenna area of PM90, bring the PM90 close to the NFC logo of RF900 as the picture on the screen. And then, allow the connection in the dialogs.

Figure 23 RF900 NFC tag location

- 4. Check the device and reader are connected properly
  - Enabled Connect to RFID Reader toggle switch and connected RF900's name is displayed
  - · An icon indicating the RF900's battery level is shown on the status bar
  - RF900's state LED lights green

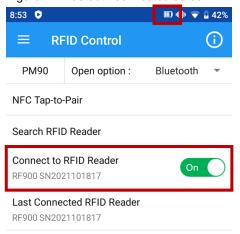

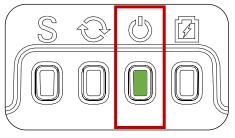

Figure 24 Bluetooth connected screen

#### Search RFID Reader

Search nearby RF900 and choose one of the RF900.

- 1. Change connect mode to Bluetooth on RF900 and **Open option** of RFID Control to **Bluetooth**.
- 2. Tap Search RFID Reader on RFID Control

Figure 26 Search RFID Reader

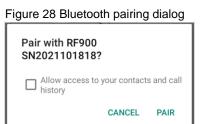

| ≡ RF                   | ID Control       |            | <b>(</b> ) |
|------------------------|------------------|------------|------------|
| PM90                   | Open option :    | Bluetooth  | -          |
| NFC Tap-to-Pair        |                  |            |            |
| Search RFID Reader     |                  |            |            |
| Connect to RFID Reader |                  | $\bigcirc$ | Off        |
| Last Conne             | cted RFID Reader |            |            |

3. When desired RF900 name appears, stop searching by tapping **STOP** and select the name

Figure 27 Searching RFID reader

| ← Search RFID Reader                    | G | ÷                      | Search RFID Reader       | G |

|   | L |                        |                          |   |
|   | L |                        |                          |   |

4. Allow the connection in the dialogs

- 5. Check below items to confirm that RF900 is connected properly (Refer to Figure 24, Figure 25)
  - Enabled Connect to RFID Reader toggle switch and connected RF900's name is displayed
  - An icon indicating the RF900's battery level is shown on the status bar
  - RF900's state LED lights green

#### Disconnect

In one of the following cases, the Bluetooth communication will be disconnected.

- Change **Open option** to **Wired** (In RFID Control app)
- Disable Bluetooth from PM90
- Turn off the Connect to RFID Reader toggle switch (In RFID Control app)
- Turn off the RF900 or PM90

#### Reconnect

To reconnect to the last connected RFID reader, tap **Connect to RFID Reader** toggle switch and wait until the devices are connected.

Figure 29 Reconnect toggle switch

# **Configuration Settings**

### **Apply Configuration**

To adjust configuration, use RFID Control app or importing JSON file.

#### Apply via RFID Control

After connecting the devices, tap  $\equiv$  to open the side menu bar and select **Configuration**. And then, adjust each configuration manually using RFID Control interface.

| Figure 31 Side menu bar - Configuration | Figure 30 Configuration   |  |  |
|---|---------------------------|--|--|
| RFID Reader Solution                    | ← Configuration           |  |  |
| RFID Reader Settings                    | Beep Volume On On         |  |  |
| Configuration                           | Vibrator                  |  |  |
| Wedge                                   | Radio Power<br>30dBm      |  |  |
| u Import Configuration                  | <b>Tx Cycle</b>           |  |  |
| Export Configuration                    | Tx Data Format            |  |  |
| ↓ Update RFID F/W                       | TAG_DATA Data Format      |  |  |
| Launch RFID Demo                        | PC_EPC_CRC                |  |  |
| -                                       | Filter duplicate tags Off |  |  |
| (i) RFID Reader Information             | Filter                    |  |  |
|   | Inventory Config          |  |  |
|   |                           |  |  |

#### Apply via JSON file

You can also apply the configuration by importing the JSON file which contains configuration.

The JSON file for configuration update can be made by RFID Control Configuration Tool. And it must be named as **Configuration.json** and copied into **RFIDControl/RFIDJsons** folder of host device's internal storage.

Note: Must follow the file name and path. Otherwise, RFID Control cannot find the file.

You can perform configuration update automatically or manually. Refer to below table to identify the differences and choose more suitable on your working environments.

| Methods       | Description   |
|---------------|---|
| Auto Update   | <ul> <li>Set auto update settings in JSON file</li> <li>Update configuration every time the RF900 is connected while RFID Control is running</li> </ul> |
| Manual Update | <ul><li>Perform regardless the auto update is enabled or disabled</li><li>Perform update immediately</li></ul>  |

#### Auto Update

To set up the auto update, enable and save the auto update setting (**Auto update (JSON)**) in **Configuration.json** file which contains the configurations. (Find more detail in <u>RFID Control</u> <u>Configuration Tool User Guide.</u>)

And then, launch RFID Control without any connection with RF900 to save the auto update setting on the app.

When you set up Auto update,

- Auto Update will be performed every time RF900 is connected while RFID Control is running
- Auto Update setting value will be maintained until next reading JSON file
  - JSON file is read when RFID Control is launched without any connection with RF900

# **Configuration Settings**

#### Manual Update

Manual update can be performed regardless the auto update is enabled or disabled. To apply the configuration immediately, perform update manually.

- 1. Make Configuration.json file and copy it to specified folder in internal storage of host device
- 2. Tap  $\equiv$  to open the side menu bar and select **Import Configuration**.
- 3. Tap IMPORT and wait until the process is done

(There is no need to select JSON file because app will automatically find and use the

#### Configuration.json file in the RFIDControl/RFIDJsons folder)

# Wedge Settings

### Wedge Detail

Wedge contains the below values. Find the details of each setting from RFID Control User Guide.

| Settings    | Options   | Default Value             |
|-------------|---|---------------------------|
| Result Type | Callback (User Message)<br>Keyboard Event<br>Clipboard (KEYCODE_PASTE)<br>Clipboard (Ctrl+V)<br>Intent Broadcast<br>Custom Intent | Clipboard (KEYCODE_PASTE) |
| Terminator  | None<br>Space<br>Tab<br>LF<br>Tab & LF  | None                      |
| Prefix      |   | (Blank)                   |
| Suffix      |   | (Blank)                   |

**Note**: Prefix and Suffix will be added to the tag data when Configuration – Tx Data Format is set to the option including Prefix or Suffix.

# Wedge Settings

### Apply Wedge

To adjust wedge setting, use RFID Control app or importing JSON file.

#### Apply via RFID Control

After connecting the devices, you can access **Wedge**. Tap  $\equiv$  to open the side menu bar and select **Wedge**. And then, adjust desired configuration.

| Figur                      | e 34 Side menu bar - V  | Wedge  | Figure 33 RFID Control - Wedge           |

| E                          | Launch RFID Demo        |        |  |
| í                          | RFID Reader Information |        |  |
|                            |                         |        |  |

#### Apply via JSON file

See <u>Apply via JSON file in Configuration Settings</u>. If the JSON file contains wedge setting values, Wedge settings are applied at the same time when you apply the configuration settings via the JSON file.

# **Firmware Update**

Point Mobile provides up-to-date RF900 firmware in <u>Service Portal</u>. The firmware files are provided by RFU file format, and it contains Bluetooth firmware and MCU firmware both.

To perform firmware update, download the RFU file from <u>Service Portal</u> and copy it into the specified folder of host device's internal storage.

**Note:** Must copy the RFU file to **RFIDControl/RFIDRFUs** folder of host device's internal storage. Otherwise, the app cannot find the file.

You can perform update automatically or manually. Refer to below table to identify the differences and choose more suitable on your working environments.

| Methods       | Description  |
|---------------|--|
|               | Set auto update settings and firmware filename in JSON file                  |
| Auto Update   | • Update Firmware every time the RF900 is connected via Bluetooth while RFID |
|               | Control is running   |
|               | Select firmware file manually in RFID Control                                |
| Manual Update | Perform update immediately   |

Note: RF900 must be connected via Bluetooth for firmware update.

#### **Auto Update**

To set up the auto update, enable and save the auto update setting (Auto update (RFU) & RFU filename) in Configuration.json file (Find how to set auto update in JSON file in <u>RFID Control</u> <u>Configuration Tool User Guide</u>) and copy the JSON file into **RFIDControl/RFIDJsons** folder of host device.

And then, launch RFID Control without any connection with RF900 to save the auto update setting on the app.

When you set up Auto Update,

- Auto Update will be performed...
  - Every time the RF900 is connected via Bluetooth while RFID Control is running & RFU file version is different from current RF900 firmware version
- Auto Update setting value will be maintained until next reading JSON file
  - JSON file is read when RFID Control is launched without any connection with RF900

### **Firmware Update**

#### **Manual Update**

Manual update can be performed regardless the auto update is enabled or disabled. To update the firmware of RF900 manually,

- 1. Execute RFID Control and connect RF900 via Bluetooth to host device
- 2. Tap = and select Update RFID F/W
- 3. Tap \_\_\_\_ to browse the RFU file you prepared

(The file must be in RFIDControl/RFIDRFUs folder.)

Figure 35 RFID Control – Update RFID F/W

|       |   |  |
|       |   |  |
|       |   |  |
|       | UPDATE NOW  |  |

- 4. Select the RFU file and Tap UPDATE NOW
- 5. Wait until the update process is done

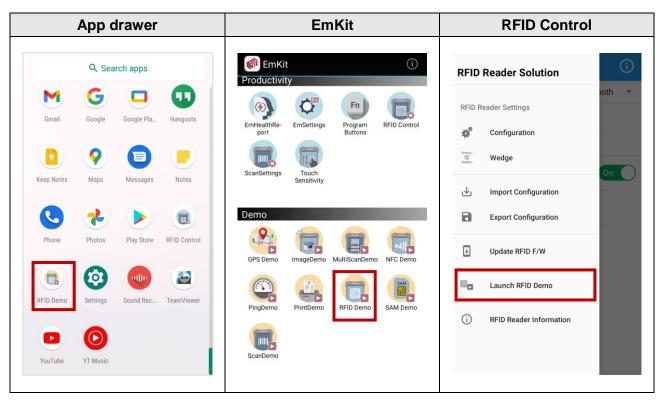

# **Read RFID Tag**

#### **RFID Demo**

You can demonstrate the function of reading an RFID tag with RFID Demo. RFID Demo will be installed together with RFID Control.

There are two ways to launch RFID Demo,

- Tap RFID Demo To from App drawer or EmKit Image
- Open the side menu bar on the RFID Control and tap Launch RFID Demo

# Read RFID Tag

### Read the RFID Tag

Before read RFID tag, make sure that the Trigger-Mode LED lights off. Turned off Trigger-Mode LED means that RF900 is in UHF RFID mode.

If the LED lights on red, press and hold the Trigger-mode change button until the LED turns off because red LED means RF900 is in barcode scan mode.

Figure 36 Trigger mode change button

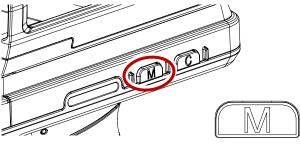

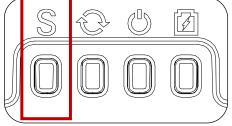

Figure 37 Trigger-Mode LED (UHF RFID mode)

Read RFID tags after connecting the RF900 to your PM90. To read RFID tags, aim the tag and then press the trigger button of RF900 or tap the **Read RFID Tag** button on the screen.

Figure 39 Reading RFID tag

# **Read RFID Tag**

**Note:** Make sure the RF900 is in UHF RFID mode. If you try to read RFID tags using RFID Demo app while RF900 is in **barcode scan mode**, it does not work and a toast message pops up on the screen.

For demonstrating barcode scan function, use Scan Demo application.

Tap  $= \uparrow$  to sort the delivered tag data in order and tap  $\blacksquare$  to clear the tag data.

**RFID Demo** =. Total Count : 4 Total Read Count : 10 RFID Tag Info Read Count 20211006161012345111543212aa 3 01f1 199302261234554d321931234941 2 23401632aed7 1029405937ue101fa120492f3f7cf0 3 ea 9876a65432108019035481305467 2 c789 Continuous Read Save Log Auto Read Beep Sound **Read RFID Tag** 

Figure 41 RFID Demo - Read tags

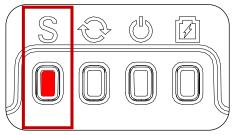

# Scan a Barcode

If you want to scan a barcode instead of RFID tag, change the trigger mode of RF900. Trigger button will activate the barcode scan action.

- 1. Press and hold the trigger mode change button until the Trigger-Mode LED turn on red.
  - Figure 42 Trigger mode change button

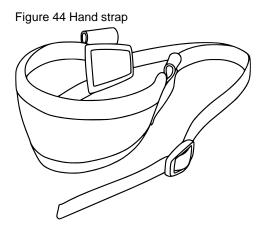

Figure 43 Trigger-Mode LED (Barcode scan mode)

- 2. Execute **Scan Demo** or scanner application, and then scan a barcode by pressing the trigger button of RF900.
- 3. Check the barcode information displayed on the app.

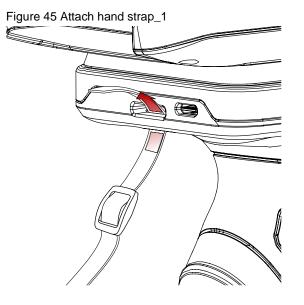

# Accessory

A hand strap is enclosed in the RF900 package. Attach the strap and carry the reader more comfortably.

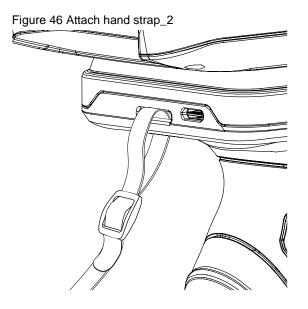

To attach the hand strap,

1. Thread the strap through the hand strap hole next to the USB connector.

### Accessory

2. Slide the strap through the buckle at the appropriate length.

# **Safety Information**

#### **Battery Safety Information**

Follow battery safety guidelines in this manual for safe usage and disposal of Li-ion batteries. Improper battery usage may result in an explosion, fire, or other critical hazards.

#### **Battery Usage & Disposal Guidelines**

- 1. Use only Point Mobile approved batteries and charging accessories. Other batteries and charger may damage the device.
- 2. Do not disassemble or modify the battery. Do not bend, shred, deform the battery.
- 3. Do not expose the battery to excessive heat or cold. Do not place the battery into a microwave oven or dryer.
- 4. Do not short-circuit the battery or allow a foreign object to battery contacts.
- 5. Do not burn, expose to water, or other liquids the battery.
- 6. If battery leakage is observed, avoid any contact with the skin or eyes. If contact has been made, wash the affected area with water for 15 minutes, and seek medical attention.
- 7. Follow the local regulations for the disposal of used batteries.
- 8. Do not store or charge the battery in direct sunlight or in areas prone to get hot such as in a parked vehicle, near a heat duct, or close to other heat sources.

#### **Battery Charging Guidelines**

- 1. Do not charge the battery in or near areas with materials that could obstruct charging or cause a short-circuit.
- 2. Do not charge the battery in the excessive hot or cold area.
- 3. Separate the charger from the battery as soon as possible when the battery is fully charged.

# **Safety Information**

#### **Battery Storage Guidelines**

Storing the batteries is as important as using it safely. Battery is a core part of the device's performance so that you should treat the batteries safely.

- Batteries should be stored in the clean, dry and ventilated environment within ambient temperature ranges of 20±5 °C
- 2. Keep batteries away from corrosive substances.
- 3. Keep batteries away from fire and heat.
- 4. Batteries are charged while producing to below 20 ~ 30 % of full capacity for safety regulations.
- 5. Charge it for 30 minutes –1hour t least once every six months to prevent full discharge and keep the performance, when you are not using the battery for a long period.

**Notice:** The battery is consumable goods. Point Mobile provides warranty for battery in 6 months after purchase. If you suspect the battery swelling, change the battery and contact Point Mobile to use safely.
